

I Claim:

1. A system for transmitting real-time information regarding a restaurant, the system comprising:

an apparatus having a transmission means in the restaurant for transmitting information regarding the restaurant; and

a display means for displaying the information regarding the restaurant.

2. The system of Claim 1 further comprising:

a network for receiving and storing the information.

3. The system of Claim 2 wherein the network is the Internet.

4. The system of Claim 1 wherein the first information is displayed on the display means simultaneously as the information is input into the processing unit.

5. The system of Claim 1 further comprising:

a receiving means for receiving the information transmitted by the apparatus in the restaurant.

6. The system of Claim 1 further comprising:

an input means for inputting the information into the apparatus.

7. The system of Claim 1 wherein the information is posted on an Internet website.

8. The system of Claim 1 wherein the transmission means is wireless.

9. A method for transmitting information regarding a restaurant, the method comprising the steps of:

providing a first apparatus having a transmission means in the restaurant for transmitting information regarding the restaurant;

inputting the information into the apparatus regarding the restaurant; and

transmitting the information.

10. The method of Claim 9 further comprising the step of:

transmitting the information regarding the restaurant to a display means to be viewed by a person outside of the restaurant.

11. The method of Claim 9 further comprising the steps of:

providing a network wherein the information is received and stored; and
retrieving the information from the network.

12. The method of Claim 9 further comprising the steps of:

providing a computer network; and
transmitting the information to the computer network.

13. The method of Claim 12 further comprising the steps of:

providing a website on the computer network; and
posting the information on the website.

14. The method of Claim 9 further comprising the steps of:

accessing the information via a computer.

15. A restaurant for providing real-time reviews to potential patrons, the restaurant comprising:

an apparatus having an input means and processing means wherein a patron enters information with the input means;

transmission means associated with the processing means for transferring the information to one or more of the potential patrons.

16. The restaurant of Claim 15 further comprising:

a plurality of apparatuses, each having a processing means and an input means and are commonly

networked to each other.

17. The restaurant of Claim 15 wherein the information relates to the restaurant.

18. The restaurant of Claim 15 wherein the transmission means is a radio frequency antenna.

19. The restaurant of Claim 15 wherein the transmission means is a connecting wire having access to a network.

20. The restaurant of Claim 15 wherein the restaurant has at least one table and the apparatus is provided on the table.
